

# Development Engineer (m/f/d) ADAS / AD Systems - System development

## Company

FDTech

## Location

Chemnitz, Munich

Our expertise is the development of algorithms for automated driving, always with a focus on feasibility for series production. FDTech thus provides essential core components for the expansion of current and the shape of future mobility. Change is happening now. We are shaping this change.

## Tasks

- You design the system architecture
- You define requirements, parameters, functions and components of the system
- Coordination with system and component suppliers
- Commissioning of system / single components
- You carry out the overall system tests and validations
- You do the analysis and troubleshooting

## Qualification

- You successfully completed studies in electrical engineering, computer science, physics or similar
- You have experience in the field of optical driver assistance systems, vehicle systems and networking
- You have experience in C/C++, MatLab/Simulink, Python, ETAS/Vector Tools
- Good German and English skills
- You have an analytical and conceptual thinking
- You have strong team and communication skills
- You show a high level of personal responsibility and initiative

## Benefits

- SpenditCard
- Company pension scheme
- Capital-forming payments
- Flexible working hours
- Mobiles work
- Flat hierarchies
- Possibility to help shape the company
- Buddy Program
- Free drinks

## Contact information

Our expertise lies in developing automated driving functions for mobility solutions from the concept phase and prototyping to systems integration- always with a keen eye on feasibility for series production.
